Speculative fiction
Science fiction
Techno-thriller

EARLY REVIEWS

“A sharp appraisal of tech-world machinations and an entertaining adventure tale.

- *Kirkus Reviews*

***Tired* begins as a sharp workplace satire before steadily transforming into a fast-moving techno-thriller. The escalating danger keeps the suspense high through the final act ... with humor that never undercuts the stakes.”**

- *The BookLife Prize* (9.25/10)

ABOUT THE BOOK

Miles is tired of the rat race—and now he knows that it’s not the kind of tired sleep can fix. That’s because Titan’s new device, the Titan Z, reduces sleep to two hours a night, unlocking twenty-two waking hours of pure potential. In theory. But when Miles and a tech-skeptic developer discover that Titan’s controversial founder may have darker plans for the world’s favorite new device, they need to decide who to trust and how far they’ll go to reveal the truth...before they’re silenced by Titan’s cleanup crew. Miles has long wished to be able to call his life remarkable. Now, for better or worse, he’ll get his chance.

ABOUT THE AUTHOR

Erik Dargitz lives in Seattle, where he works as a creative director at an ad agency. His first novel, *The Odyssey of Fletcher*, was released in late 2023. His short stories have appeared in Press Pause Press, Erato Magazine, Mystery Tribune and elsewhere. When not writing, he’s probably getting tackled by his kids, talking to his dog, or losing to his wife at gin.
